

LABORATORY EXERCISE

Creating a Simple Web Application Skeleton

Course: _____

Date: _____

Student Name(s): _____

Section: _____

I. Objectives

At the end of this laboratory exercise, students should be able to:

1. Create a basic web application folder structure.
2. Design simple HTML pages using proper semantic elements.
3. Apply basic CSS styling.
4. Understand the separation of structure (HTML) and style (CSS).
5. Demonstrate participation through hands-on development.

II. Tools and Requirements

- Text Editor (VS Code / Notepad++)
- Web Browser (Chrome / Edge / Firefox)
- Basic knowledge of HTML and CSS

Page Requirements

1. index.html

- Header with website title
- Navigation menu (Home, About)
- Main content section with welcome message
- Footer with copyright

2. about.html

- Short description of the web app
- Developer/student name
- Link back to Home page

CLASS PARTICIPATION RECORD

Criteria	Description	Score
Attendance	Present and on time	___ /10
Hands-on Activity	Actively created files and structure	___ /10
Collaboration	Helped or worked well with classmates	___ /10
Task Completion	Finished required web skeleton	___ /10
Total		___ /40

Criteria	Excellent (10)	Good (8)	Fair (6)	Poor (4)
File Structure	Complete and correct	Minor errors	Incomplete	Incorrect
HTML Content	Proper and semantic	Few issues	Basic only	Incorrect
CSS Styling	Clean and readable	Minimal	Poor	None
Navigation	Fully working	Minor issue	Partial	Not working
